For a more subtle approach, mix and match soft furnishings like seat cushions or rugs in varying shades of Clay to create depth. This works particularly well to soften angular kitchens and rooms with hard surfaces.

# Built to Last. Designed to Love.

Made using an extruded PVC solid core and a lightweight foam structure, our shower panels are as strong as they are sleek. With an easy-fit tongue and groove profile, you'll be up and running in no time — no specialist tools needed.

Every panel is hygienic, mould resistant, non-porous, and 100% waterproof (just add silicone for a watertight seal). It's everything you'd expect from Luvanto: reliable quality, lasting value, and style that works beautifully for real life.

## Effortless Style, Everyday Practicality

Choose from two classic finishes — Carrara Marble or Grey Marble — both in a high-gloss sheen that brings instant elegance to your space. Each panel is easy to clean, cost-effective, and fully recyclable, so you can enjoy luxury that looks good, feels good, and does a great job. With a range of metal trims available (internal corner, external corner, straight joint, and end cap), you can achieve a flawless finish, every time.

From family bathrooms to busy ensembles, these panels are built to handle the everyday chaos with calm, confidence, and a touch of flair.
