

Luvanto
Luxury Design Flooring

YORKSHIRE HOUSE, CASTLEFORD

Our client, Head Office Interiors, came to us looking for vinyl flooring which would be hardwearing but easy to maintain, to be fitted throughout a multistorey apartment block. Further specifications included flooring that was warm underfoot but would not look like typical vinyl flooring.

"We needed a product that could be used throughout all habitable rooms of a multistorey apartment block for speed of fitting. We also needed something that came with an acoustic underlay.

Luvanto luxury vinyl flooring fitted the bill exactly. We chose Luvanto because the product had a bevel edge, came in random pattern planks and fitted our budget perfectly. The client had a difficult decision to make thanks to the wide range of styles and patterns available!

They selected Luvanto Design Distressed Olive Wood, Natural Sawn and Sun Bleached Spruce for the apartments' living areas and Sandstone tiles for the main reception.

The product was easy to fit and the finished result was excellent. We've no doubt it will look as good as new for many years to come. The client was delighted and so were the residents when they moved in. Most of them have commented that they love the quality look of the floor which is better than you would normally find in apartments of this kind. The fact that it is easy to clean and maintain is an added bonus and no-one has asked whether it actually is real wood or stone flooring yet – a credit to the authentic look!"
